EXPERIENCE

Elite Marketing Ventures Irvine, CA — Web Developer

Nov 2018 - Nov 2019

- Reliably built and maintained eCommerce websites with HTML, CSS, PHP, JavaScript, and other site-building web applications such as WordPress.
- Configured & deployed DigitalOcean web servers to host sites by implementing DNS, SSL, etc. with minimal downtime.

Freelancer Garden Grove, CA — Web Developer

Jun 2018 - Nov 2018

- [Site](#) — Fulfilled customer requirements by building a responsive site custom-tailored for electronic musician VVN with React. The site features the full catalog of the artist's music, photos, and links to various streaming services.
- [Site](#) — Developed responsive website for restaurant Lambada Tea via React with visual features such as a dynamic image carousel, parallax effects, etc.

PROJECTS

Appility — [App](#) | [Github](#) — Full Stack Serverless Quiz Application

- Built a serverless application deployed on AWS with React, Redux, Node, Material UI, API Gateway, Lambda, CodePipeline, Cognito, Dynamo, etc.
- Application features quizzes for several app development technologies, dynamic score tracking on AWS Dynamo database, AWS Cognito authentication, smooth React Spring animations, and more.

Get Set Go — [Reel](#) | [Github](#) — Unreal Engine VR Music Experience

- Utilized Sequencer and Blueprints to implement an event driven experience.
- Developed various custom visual effects leveraging material parameters, various interpolations, event driven functions, and more.
